Comments received from the Landscape Planning Officer:

There does not appear to be any reference to protective fencing which is unacceptable given the existence of retained trees on site and just beyond the boundary to both north and south. There needs to be details of the fencing ideally Heras fence panels and an indication of where the fencing is to be erected, as far as possible from the trunk of the trees, both within the site and beyond. If the application is approved the agreed fencing needs to be erected in the approved location, prior to the start of works and remain in place the entirety of the works on site.

Officer update to recommendation:

Condition 3 be amended so that the developer has to submit a tree protection plan prior to works commencing.
