Dear Council committee

I am writing on behalf of our company, E Gallone Ltd, to request a licence to trade at Harlestone Firs.

As a family company, we have been trading at this site for over 60 years and there has NEVER been any safety issue, or concern raised.

We received a letter on 13th March from Mikolaj Waligorski, the licencing officer at Daventry Council, stating that we must cease trading at this site due to a safety concern, as this is a prohibitive road. This is the first time we have been made aware of this.

We are a well-respected, long standing local family firm and we take great pride in providing the county with the highest quality ice cream, in a safe environment. We have worked in conjunction with the council on a number of events and our customers have grown up buying our ice cream at Harlestone Firs.

This site is isolated, away from housing and next to a garden centre, in a purpose built parking bay. The traffic has recently been made calmer by the addition of a roundabout and further improvements are imminent as the new bypass will take even more traffic away from this area.

We have always taken the Health and safety of our customers into consideration and produce risk assessments for each site. (I have attached this)

I am also attaching a letter from Alan Eaton MBE, the organiser of the Hollowell Steam Rally, who we have worked with for very many years, who can vouch for our safety record.

For over 60 years, we have operated at Abington Park, now under a street vendors licence. We would be happy to discuss a similar arrangement at Harlestone Firs, if this could be arranged.

Yours Sincerely

Aldo Gallone
